CONSENT TO TREAT MINORS

What would happen if your child became ill or had an accident while you were away? Would your child be able to receive medical treatment? A physician's office or emergency room is not legally authorized to treat a minor without the parent's or legal guardian's consent. (Unless of course it is a life-threatening emergency.) That's why it is important for you to take necessary precautions. Take a moment to complete this consent form and leave it with the responsible caregiver to insure your child will receive prompt medical treatment if an emergency occurs.

Child's Name: _____
